Commitment to achieving Net Zero

Contronics Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2020	
Additional Details relating to the Baseline Emissions calculations.	
Historic baseline data derived from available data which deviates from the requirements of this measure, as no Scope 3 emissions data available to report. 2020 is our baseline year for Scope 1 & 2 emission only.

Emissions reduction targets

To continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

- Our ambition is to become carbon negative by 2050
- We are committed to following the Science Based Targets initiative and have proposed the following targets:

We project that carbon emissions will decrease over the next five years to 7.08 tCO₂e by 2028. This is a reduction of 26.63% since baseline year 2020 (for Scope 1 & 2 only)

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2020 baseline.

- Introduction of LED lighting
- Introduction and use of renewable electricity tariff
- Reduction in travel for commuting
- Introduced certification to ISO 14001
- Reduction in business travel/flights
- Separation of Waste Stream, increased recycling

The carbon emission reduction achieved by these schemes equate to 1tCO₂e, a 3% reduction against the 2020 baseline and the measures will be in effect when performing the contract.

Future Carbon Reduction Plans

In the future we will and hope to implement further measures such as:

- To thoroughly examine Scope 3 emissions and use the data to set the targets and goals for the wider footprint.
- Reduction in use of fuels used in fleet vehicles
- Change of fuels to produce less carbon emissions
- Move to electrification of fleet in due course

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
